

Southfield  
DENTAL PRACTICE

# WELCOMES Hygienist

Meet our new hygienist  
**Leianne Spaulding**  
[Dental Hygienist  
& Therapist]  
GDC No. 11299

Over the past year Southfield has registered over 300 new patients at the practice, and the feedback has been really encouraging. It has been perfect to have started the practice from scratch, having longer appointments to spend the time needed to carefully plan and deliver the dental treatment that patients have required.

Chris Gollings (the principal dentist) has worked alongside his staff for nearly 20 years, and the latest recruitment was no exception. Leianne first worked for Chris as a dental hygienist in 2001 at his previous practice on the south coast. She qualified from the Eastman Dental Institute as a dental hygienist and therapist, which enables her not only to provide the routine scaling and cleaning sessions, but also many other procedures.

A dental therapist is qualified to treat children in all aspects of dentistry including cleaning, fillings and extractions. They are able to carry out simple adult procedures such as fillings, and can assist with radiography (x-rays), examinations and impression taking (models, mouthguards, snoreguards, tooth whitening). This is in addition

to all the hygienist procedures such as the simple and complex periodontal (gum) treatments.

Leianne has a gentle and friendly manner with patients, and always goes the extra mile to help make the experience as comfortable as possible. That often means taking more time, and sometimes using anesthetics which she is qualified to use. If you are nervous or have had a bad experience she welcomes patients who are anxious, and will always treat patients with a topping of TLC!

Southfield Dental Practice

## Here are the options for prospective patients who would like to join the practice:

### Practice Visit

Patients are welcome to visit the practice and have a look around at the facilities before making a decision to join. One of the staff will guide you around and answer any questions.

### Meet and Greet

Another option is to meet one of the dentists when you are visiting and allow them to introduce themselves and again answer any questions.

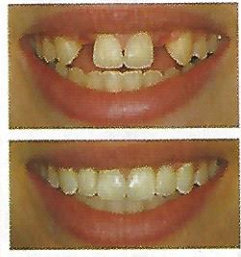

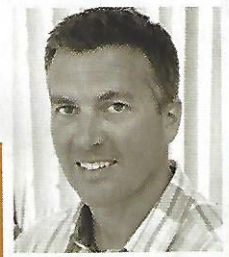

### New Patient Consultation

Patients can reserve their initial appointment with the reception team. At this visit they can discuss their individual aims and requirements.
